AeroBMSCE

PARTNERSHIP PROSPECTUS

ONE OF INDIA'S LONGEST-RUNNING COMPETITIVE AEROSPACE & UAV TEAM
WITH INTERNATIONAL FLIGHT HISTORY

AEROBMSCE

ABOVE GRAVITY, BEYOND LIMITS

WHO WE ARE

AeroBMSCE is the official aerospace, aeromodelling, and unmanned systems innovation club of BMS College of Engineering, operating from Propel Lab-3. Established in 2012, the club brings together engineers from 10+ departments to design, build, and test advanced aircraft, drones, and autonomous systems.

WHAT WE DO

- Competitive aircraft & UAV design
- Drone racing & autonomy
- Industry-grade fabrication & testing
- Talent development through real-world engineering

WHY IT MATTERS

- Engineers trained on real constraints
- Talent exposure before graduation
- Brand visibility in elite technical ecosystems

OUR VISION

We envision AeroBMSCE as a leading aerospace and unmanned systems research group, renowned for design excellence, innovation, and competitive success. We aim to cultivate future leaders in the aerospace and drone industry, establishing a legacy of engineering excellence that inspires students worldwide.

OUR JOURNEY & IMPACT

- Team Yaksha - International Competitions
- Team Blue Impulse - Aeromodelling
- TeamFlying Phantoms - Drone Development
- Team Vectors - Drone Racing

Since we have started, we've taken on and successfully completed 75 + projects, collaborating with students from more than 10 departments across the college. Along the way, we've produced 50+ research papers, reports, and certifications that highlight the creativity and dedication of our members. Our competitive spirit shines through our teams that represent us at various prestigious events:

Credibility Summary

16+ years | 75+ projects | 20+ podium finishes | International flight history

Our Milestones

2026 SEASON

**SAE International Aero Design West
2nd Place Internationally** under
MATLAB Simulation Awards.

Overall #16 Globally in Micro Class
Category

Fort Worth, Texas, USA

SAE Aerothon

1st Place under Unique Technology
development at **ADDC 2026.**

2025 SEASON

SAE Aerothon

2nd place overall, **₹1,25,000** cash prize
(Nov 2025)

SAE-Drone Design Challenge

1st place - Best Technical Presentation,
₹10,000 cash prize
(May 2025)

SAE Autonomous Drone Design
Challenge

1st place - Best Innovation
₹5000 cash prize (April 2025)

2024 SEASON

NITK Drone Racing Competition
2nd place
(Oct 18-20,2024)

Global Academy of Technology
(Drone Racing)
1st place
(Nov 2024)

SAE International Aero Design West
12th place globally
(Aug 2024)

2022 SEASON

SAE Aerothon
3rd place, ₹50,000 cash prize

III South India Exhibition
2nd place, ₹15000 cash prize
Kalpataru Institute of
Technology,Tiptur,Karnataka

AI-VTOL (Techfest,IIT Bombay)
4th place nationally

SAE International Aero Design West
9th Place (Design report), 11th Place
(Technical Presentation) Globally

2020 SEASON

SAE-India
1st place overall, ₹1,00,000 cash prize
Team Blue Impulse won Nationally

SAE Aero Design,West
8th place in design standings
globally

2018 SEASON

SAE INDIA
Anna University, Chennai
3rd place overall,
2nd place in Design Report
AND MANY MORE...

WHAT'S NEXT FOR US?

Upcoming Competitions (2026 & 2027) :

We aim to participate in the following prestigious aerospace and UAV competitions, representing our institution at multiple levels:

- **NACDEC 2026** – Organized by the Aeronautical Society of India
- **ISRO IROC** (International Rover Challenge – ISRO Track)
- NITK Drone Racing Competition 2026
- **SAE International Aero Design West**, 2027
- **SAE Aerothon** 2027

Research & Development Initiatives:

(Ongoing and Upcoming)

- **Indigenous Flight Controller Development** – End-to-end hardware and firmware design
- **Electronic Speed Controller (ESC) Development** – High-efficiency propulsion electronics
- **GPS-Denied Navigation Systems** – Vision- and sensor-based autonomous navigation
- **Surveillance Aircraft Development** – Re-configurable Multi-Mission Fixed-Wing UAV with Convertible Propulsion and Integrated Modular Payload Bay.
- **Confidential Defense Project** – In collaboration with **DRDO** (details restricted)
- **Morphing Wingtip Mechanisms** – Adaptive aerodynamics for performance optimization
- **Directional Stability Enhancement Using Deployable Micro-Fins** – Active stability control for UAV platforms

Strategic Project Status

- 100% of the Research, Development, and Technical Fabrication for our current flight systems is subsidized by R&D department at BMS College of Engineering.
- We have a flight-proven product ready for the world stage.

How Our Partners Enable This

- **Financial Sponsorship** – Support for travel, accommodation, logistics
- **Academic & Research Guidance**
- **Opportunity & Exposure**

COLLABORATION TIERS

PLATINUM PARTNER

Title Partner | Strategic Alignment

- **Primary logo on aircraft & UAV models**
- Logo placement and verbal acknowledgement in official videos and key events
- Priority placement on flags, banners & standees
- Featured in reports, submissions & press releases
- Direct engagement with core team & leads
- Association with flagship projects & major events

GOLD PARTNER

High Visibility | Competition Presence

- **Secondary logo on selected aircraft models**
- Logo on team uniforms & presentations
- Shared branding on competition banners & standees
- Recognition across events & social media
- Branding during workshops & technical events
- Presence at national & international competitions

SILVER PARTNER

Event & Media Visibility

- Logo on team uniforms
- Logo on presentations & project materials
- Inclusion on team banners & shared standees
- Recognition in event communications
- Social media mentions during competitions
- Visibility at select AeroBMSCE events

TECHNICAL & ECOSYSTEM PARTNER

Design | Simulation | Analysis Partner

- Tools showcased in design & competition reports
- Credit in technical presentations & submissions
- Co-branded hands-on workshops
- Logo on reports, posters & certificates
- Technical banners & workshop standees
- Early access to high-performing students

Why Partner with Us?

Partner Outcomes

- Early access to **industry-ready aerospace & UAV talent**
- Association with **nationally & internationally ranked teams**
- Technical credibility through real-world flight systems & deployments
- High-impact brand visibility at scale (**20,000+ digital and 50,000+ on-ground impressions**)
- Premium brand positioning within elite engineering ecosystems (SAE competitions, IIT techfests,)

Our Collaboration Ecosystem

Design, Simulation & Engineering Software
